Section 2 Effluent Records (Where 1.3 Applies)

2.4.1 * Limited Option: The requirement to meet the Initial Values tabulated above may be delayed until 31 Dec. 2016 for processing plants that can demonstrate that the water quality (as measured by the same set of variables) within the mixing zone (samples taken within a few meters of the discharge pipe) and outside the mixing zone (samples taken upstream from the discharge pipe) does not differ.

**Interpretation for 2.4.1**

BAP is hereby removing the “cut-off” date of 31 Dec. 2016 for the Limited Option, and this change is effective immediately.

The clause is hereby modified as follows:

2.4.1 * Limited Option: The requirement to meet the Initial Values tabulated above may be **voided** for processing plants that can demonstrate that the water quality (as measured by the same set of variables) within the mixing zone (samples taken within a few meters **downstream** of the discharge pipe) and outside the mixing zone (samples taken upstream from the discharge pipe) does not differ. **Sampling must be done on a quarterly basis.**
